

## SUGHERA®

Our proud creation,  
your natural choice.

Sughera® is a **REVOLUTIONARY** material consisting of synthetic rubber blended with micro granules of natural cork. For the first time, micro-agglomerated natural cork pieces are molded by injection and shaped without using any glue.

### • **Lightness and durability**

Sughera® blend allows us to produce very light, practical and extremely resistant closures. Sughera® blend is safe, unbreakable and does not crumble.

### • **Versatility**

Because Sughera® is injected, it can be produced in countless shapes and models, and customized with embossed or debossed logo of textures. With Sughera® you can also play with colours, to make a great match with your whole packaging.

### • **A Natural look in a high-tech guise**

The agreeable visual and tactile perception of natural cork meets the highest technical performances and durability of the synthetic rubber blend.

### • **A comfortable user experience**

Sughera® closures are very comfortable to be used: thanks to its rubber composition, the grip on the bottleneck is excellent, ensuring this way a very practical user experience.

# WHY SUGHERA®

The infographic features a central pile of light brown granules with two tan-colored tablets resting on top. Surrounding this central image are six text labels, each connected to the center by a curved arrow pointing outwards. The labels are: 'PATENTED PROCESS' (top-left), 'NATURALNESS' (top-right), 'EXTREMELY RESISTANT' (middle-left), 'NO CRUMBLING ISSUES' (middle-right), 'BEST GRIP ON THE BOTTLENECK' (bottom-left), and 'BEST ELASTIC RETURN' (bottom-right). The entire composition is set against a white background with several grey, rectangular tablets scattered around the edges.

**PATENTED  
PROCESS**

**NATURALNESS**

**EXTREMELY  
RESISTANT**

**NO CRUMBLING  
ISSUES**

**BEST GRIP ON  
THE BOTTLENECK**

**BEST ELASTIC  
RETURN**

Provide the right closure
